

# SHOC2 and KRAS

Corpus co-mention network with DepMap CRISPR co-dependency

**DepMap r**    — positive    — negative    - - - no DepMap pair    fainter = weaker |r|

**Papers**     1     3     10     30     the two proteins of interest

Gene-level view; spelling variants merged. Edge width counts distinct papers. Drawn: edges between a protein of interest and its strongest partners (84 partners in the corpus); edges among partners are omitted. DepMap r: Pearson correlation of CRISPR gene effect over 1,208 cell lines. Kd, Ki: tightest value reported for the wild-type protein. This pair was forwarded in 2 of 2 KRAS runs in the wildcard evaluation.
